February 2, 2011

Dear Member of the Legislative Assembly:

**Re: Questionnaire on Proposed High Voltage Power Line in Your Constituency**

One of the 500 kilovolt high voltage power lines identified in the *Electric Statutes Amendment Act, 2009* as “critical transmission infrastructure” is proposed to be constructed within or very near to your constituency.

RETA (Responsible Electricity Transmission for Albertans) has commissioned or conducted a number of public opinion surveys regarding the views of Albertans on electricity transmission in Alberta. As part of our survey of public views on this issue, which has become increasingly important to Albertans, we would very much appreciate if you would complete the attached questionnaire and return it to us by February 18, 2011.

One of the public opinion surveys we commissioned and the results of a ballot count taken from over 3,000 people who attended one of our public Town Hall meetings in late 2009 can be viewed at <http://retasite.wordpress.com/public-opinion-surveys/>. Additional information about RETA is available at [www.RETA.ca](http://www.RETA.ca).

We thank you for your time to fill out our questionnaire so that we may better inform our membership and the public of your views on this most important issue.

Thank you,

Original Signed

Bruce Johnson  
President, RETA
