Fire, DP&L crews respond to Smithville Rd. crash

By [Breaking News Staff](#) Dayton Daily News

DAYTON —

Emergency rescue crews as well as Dayton Power and Light officials are on scene at a crash that knocked out power to some this afternoon.

Just before 3 p.m., crews were dispatched to a single-vehicle crash in the 1800 block of South Smithville Road. Early reports indicated that someone was trapped inside the vehicle, which was on fire.

First responders reported seeing power lines down and sparking near the vehicle.

DP&L workers were called to the scene because several area residents experienced a power outage following the crash.

There was no immediate information on the status of the driver.
